

WING-MOUNTED MOWER

APPLICATION:
COMMERCIAL & MUNICIPAL/ AGRICULTURAL

OVERVIEW

The Wing-Mounted Mower from Capital I Industries, Inc. delivers fast and reliable performance for commercial, municipal, and agricultural needs. Hydraulically driven and fully controlled from the cab, it makes mowing efficient and easy. With speeds up to 10 MPH and a 7.5-foot width, it covers ground quickly. Most counties can mow ditches two to three times a summer, thanks to higher travel speeds and less downtime due to fewer moving parts.

Its design throws grass to the bottom of the ditch so it will not interfere with blading or pulling shoulders.

A hydraulic extension arm enables a second pass, while the loose link mounting assembly allows the mower to float over obstacles. Safety and visibility come standard with the post-less front mount. Modular and quick to attach, it is compatible with all grader makes. Since 1999, the Wing-Mounted Mower has been trusted for its toughness, reliability, and results that last.

FEATURES

HIGH-SPEED PRODUCTIVITY

With mowing speeds up to 10 MPH and a 7.5-foot cutting width, the Wing Mounted Mower covers ground fast. Counties can mow ditches two to three times a summer, reducing labor and equipment costs while maximizing efficiency across residential, municipal, commercial, and agricultural projects.

CLEAN AND CONTROLLED CUT

The mower's unique design throws grass to the bottom of the ditch, keeping it clear of roads and shoulders. This prevents interference when blading or pulling material, delivering cleaner results. Operators stay in full control from the cab, adjusting the mower with ease for precise, reliable performance.

FLEXIBLE OPERATION

Equipped with a hydraulic extension arm, the mower easily makes a second pass without repositioning equipment. The loose link mounting assembly allows it to float smoothly over rocks, slopes, and obstacles, ensuring durability, reduced wear, and a consistent cut even in challenging terrain or tough conditions.

SAFE AND VERSATILE DESIGN

The post-less front mount provides operators with greater visibility and improved safety. Its modular design supports multiple attachments, including the Gravel Reclaimer and Post-less Wing. Compatible with all grader makes and easy to remove, it delivers unmatched flexibility for year-round use.
