OVERVIEW

The Capital I Gravel Reclaimer / Sloper is a high-efficiency attachment designed to optimize gravel usage and support road maintenance operations. With a 42-inch working width and a 24-inch extendable arm, it allows for comprehensive coverage and can help reclaim up to 35% of gravel, offering potential cost savings over time.

Its innovative postless design provides unobstructed visibility for operators, ensuring precise control during operation. The rear arm features a loose link assembly that enables it to float over obstacles up to 32 inches, adapting seamlessly to uneven terrain.

Additionally, the preloaded extension arm spring maintains stability in the carry position, making it a reliable tool for efficient and effective road maintenance.

FEATURES

COST-SAVING GRAVEL RECLAMATION

The Gravel Reclaimer / Sloper efficiently reclaims up to 35% of gravel, significantly reducing material costs. Its 42-inch working width and 24-inch extendable arm provide full coverage, making it a smart, cost-effective investment for road maintenance operations that pays for itself quickly.

PRECISION CONTROL AND VISIBILITY

The postless design ensures unobstructed visibility for the operator, allowing precise control over gravel distribution and slope adjustments. This feature enhances safety and accuracy during road maintenance projects, enabling crews to maintain high-quality road surfaces efficiently.

ADAPTIVE TERRAIN HANDLING

Equipped with a loose link rear arm, the Sloper floats over obstacles up to 32 inches, adapting to uneven and rugged road conditions. This flexibility ensures consistent gravel placement, reduces the risk of equipment damage, and maintains efficiency in challenging construction environments.

STABLE, EFFICIENT OPERATION

The preloaded extension arm spring keeps the rear arm stable in the carry position, allowing smooth transport and operation. This robust design reduces operator fatigue, streamlines workflow, and ensures the Gravel Reclaimer / Sloper delivers reliable, efficient performance on every road maintenance project.
